

Budgestic User Documentation

Project: Budgestic – AI-Powered Budgeting & Receipt Analysis App

Team: Rajat Adhikari, Biraj Thapa, Bishwash Thapa

1. Introduction

Budgestic is a mobile budgeting and receipt analysis application. It helps users scan receipts, track expenses, monitor income, view cash flow, and receive spending insights.

This user guide explains how to access and navigate the Budgestic app design.

2. Requirements

To view and use Budgestic, users need:

- A computer, tablet, or smartphone.
 - Internet connection.
 - Web browser.
 - Figma app design link.
 - Optional Figma account for better viewing.
-

3. Accessing the App

1. Open the GitHub repository.
 2. Find the Figma app design link in the README file.
 3. Click the Figma link.
 4. The app design will open in a web browser.
 5. Press the play/present button if required.
 6. Start from the welcome screen.
-

4. Welcome Screen

The welcome screen introduces the Budgestic application. It is the first screen users see when opening the app design. It displays the app name, logo, short description, and options to get started or log in.

From this screen, users can move to:

- Login screen.
- Create account screen.

Screenshot: Welcome Screen

5. Login Screen

The login screen represents how users access their account. Users enter their email and password to continue managing their budget.

The screen includes:

- Email input field.
- Password input field.
- Forgot password link.
- Login button.
- Create account link for new users.

To continue:

1. Open the login screen.
2. Enter the email address.
3. Enter the password.
4. Click the login button.
5. The app moves to the dashboard screen.

Screenshot: Login Screen

The image shows a mobile app login screen with a light blue background. At the top, the text 'Welcome Back' is displayed in a large, bold, black font. Below it, a subtitle 'Login to continue managing your budget' is in a smaller, grey font. There are two input fields: 'Email' and 'Password', each with a placeholder text 'Enter your email' and 'Enter your password' respectively. A link 'Forgot password?' is positioned below the password field. A large blue button with the text 'Login' is centered below the link. At the bottom, there is a link 'Don't have an account? Create account'.

6. Create Account Screen

The create account screen shows how new users register for Budgetic. This screen allows users to create a new account before accessing the main budgeting features.

The screen includes:

- Full name field.
- Email field.
- Password field.
- Confirm password field.
- Create account button.
- Login link for existing users.

To create an account:

1. Open the create account screen.
2. Enter full name.
3. Enter email address.
4. Create a password.
5. Confirm the password.
6. Click the create account button.

Screenshot: Create Account Screen

A mobile app screen for creating a new account. The screen has a light blue background with rounded corners. At the top, the title "Create Account" is in bold black text, followed by the subtitle "Sign up to start managing your budget" in a smaller, lighter blue font. Below this are four input fields, each with a label above it: "Full Name", "Email", "Password", and "Confirm Password". Each input field is a white rounded rectangle with a light blue border and a light blue placeholder text. The "Full Name" field has the placeholder "Enter your full name". The "Email" field has the placeholder "Enter your email". The "Password" field has the placeholder "Create a password". The "Confirm Password" field has the placeholder "Confirm your password". Below the input fields is a large blue button with the text "Create Account" in white. At the bottom, there is a link that says "Already have an account? Login" in a smaller, lighter blue font.

7. Dashboard Screen

The dashboard is the main screen of Budgetic. It shows a summary of the user's financial activity and gives quick access to important features.

The dashboard displays:

- Total spending.
- Monthly budget.
- Remaining balance.
- Cash flow overview.
- Income amount.
- Expense amount.
- Spending chart.
- Quick action buttons.

Users can quickly access:

- Upload Receipt.
- Add Expense.
- View Reports.
- Home.
- Receipts.
- Expenses.
- Insights.
- Profile.

The dashboard helps users understand their current financial status at a glance.

Screenshot: Dashboard Screen

8. Receipt Upload Screen

The receipt upload screen demonstrates the receipt scanning feature of Budgestic. Users can scan or upload a receipt so that the app can process it using OCR.

Users can:

1. Upload a receipt image.
2. Scan a receipt using the camera.
3. Process the receipt using OCR.
4. Review extracted information.
5. Save the expense.

The screen also displays recent receipts with their store name, date, total amount, and processing status.

Recent receipt examples shown include:

- SuperMart.
- Fresh Grocery.
- Local Market.

Receipt statuses may include:

- Processed.
- Pending.

Screenshot: Receipt Upload Screen

9. Expense Tracking Screen

The expense tracking screen shows how users view and manage expenses. It allows users to search, filter, and review transactions.

Users can:

- Search transactions.
- Filter expenses.
- View expense history.
- Add manual expenses.
- Categorise expenses.
- Check spending by date or category.

The screen includes category filters such as:

- All.
- Groceries.
- Transport.
- Shopping.

Example expenses shown include:

- SuperMart.
- Gas Station.
- Restaurant.
- Coffee Shop.
- Online Shopping.

Each expense displays the merchant name, category, date, and amount.

Screenshot: Expense Tracking Screen

10. Cash Flow / Reports Screen

The cash flow or report screen shows how users review income, expenses, savings, and category-based spending. This screen provides a deeper summary of financial activity.

The app displays:

- Total income.
- Total expenses.
- Monthly cash flow chart.
- Category spending breakdown.
- Highest spending category.
- Average daily spending.
- Savings estimate.
- Export summary button.

Example values shown include:

- Income: \$4,200.
- Expenses: \$2,847.50.
- Highest spending category: Groceries.
- Average daily spending: \$94.92.
- Savings estimate: \$1,352.50.

The category spending breakdown includes:

- Groceries.
- Transport.
- Food & Dining.
- Entertainment.
- Other.

This screen helps users understand where their money is going and how much they may save.

11. Spending Insights Screen

The spending insights screen provides AI-based analysis of the user's financial behaviour. It helps users understand their spending habits and identify areas where they can improve.

The app provides:

- Top spending category.
- Average daily spending.
- Spending by category.
- Trend over time.
- AI insights.
- Budgeting suggestions.
- Recommendations to reduce unnecessary spending.

Example insights shown include:

- You spent more on groceries this week.
- Transport costs are stable.
- Entertainment spending is close to the monthly limit.

The screen also provides access to the predictions page.

12. Predictions Screen

The predictions screen uses AI-powered predictions to help users plan ahead. It shows items that are likely to run out soon and warns users when budget limits are getting close.

The screen includes:

- Items likely to run out.
- Estimated days left.
- Last purchased date.
- Confidence level.
- Reminder button.
- Budget predictions.
- Recommendation card.

Example items shown include:

- Milk.
- Bread.
- Rice.
- Eggs.

The app may show confidence levels such as:

- High confidence.
- Medium confidence.

Budget prediction examples include:

- Grocery Budget.
- Entertainment Budget.
- Transport Budget.

The screen also gives recommendations, such as adjusting the grocery budget.

13. Notifications Screen

The notifications screen displays important alerts and reminders for the user. It helps users stay updated about spending activity, budget limits, and items that may need to be purchased again.

Notifications may include:

- Items likely to run out.
- Budget limit warnings.
- Unusual spending alerts.
- Weekly spending reports.

Example notifications shown include:

- Milk is likely to run out in 2 days.
- Grocery budget is 94% reached.
- Unusual spending detected in Entertainment category.
- Weekly spending report is ready.

Each notification includes a time indicator and an action button such as View, Adjust, or Review.

Screenshot: Notifications Screen

14. Profile and Settings Screen

The profile and settings screen shows where users manage their personal details and app preferences.

The screen includes:

- User profile card.
- Account settings.
- Budget preferences.
- Notifications.
- Security and privacy.

- Categories.
- Help and support.
- About.
- Logout button.

Users can access different app settings from this screen and customise their Budgestic experience.

Screenshot: Profile & Settings Screen

15. Budget Preferences Screen

The budget preferences screen allows users to manage their monthly budget and category budgets.

The screen includes:

- Monthly budget input.
- Category budget inputs.
- Smart budget alerts toggle.
- Save changes button.

Category budgets shown include:

- Groceries.
- Transport.
- Entertainment.
- Utilities.
- Other.

Users can adjust budget values based on their financial goals. Smart budget alerts notify users when they are approaching budget limits.

16. Troubleshooting

Problem	Possible Cause	Solution
App design does not open	Incorrect link or no internet	Check the link and internet connection.

Problem	Possible Cause	Solution
Buttons do not work	Some screens may not be linked	Return to the main screen or check clickable areas.
Screen size looks different	Browser or device size issue	Use present mode or adjust zoom.
Figma asks for login	Permission setting	Use a shared public link or sign in to Figma.
App design is slow	Internet or browser issue	Refresh the page or use another browser.
Screenshot does not appear in document	Image file path or file name is incorrect	Make sure the screenshot file is in the same folder as the document or update the image path.

17. Conclusion

Budgetic demonstrates the design and user flow of a mobile budgeting and receipt analysis application. Users can view how the app works, explore the main screens, and understand the main features.

The app helps users:

- Track spending.
- Upload and process receipts.
- Monitor budgets.
- View reports.
- Receive AI insights.
- Get predictions and notifications.
- Manage financial preferences.

Overall, Budgetic is designed to make budgeting easier, smarter, and more organised.
