

Budgestic User Documentation

Project: Budgestic – AI-Powered Budgeting & Receipt Analysis App

Team: Rajat Adhikari, Biraj Thapa, Bishwash Thapa

1. Introduction

Budgestic is a mobile budgeting and receipt analysis application. It helps users scan receipts, track expenses, monitor income, view cash flow, and receive spending insights.

This user guide explains how to access and navigate the Budgestic app design.

2. Requirements

To view and use Budgestic, users need:

- A computer, tablet, or smartphone.
 - Internet connection.
 - Web browser.
 - Figma app design link.
 - Optional Figma account for better viewing.
-

3. Accessing the App

1. Open the GitHub repository.
 2. Find the Figma app design link in the README file.
 3. Click the Figma link.
 4. The app design will open in a web browser.
 5. Press the play/present button if required.
 6. Start from the welcome screen.
-

4. Welcome Screen

The welcome screen introduces the Budgestic application. From this screen, users can move to:

- Login screen.
 - Create account screen.
-

5. Login Screen

The login screen represents how users access their account.

To continue:

1. Open the login screen.
 2. Click the login button or linked area.
 3. The app moves to the dashboard screen.
-

6. Create Account Screen

The create account screen shows how new users register.

The screen may include:

- Name field.
 - Email field.
 - Password field.
 - Register button.
-

7. Dashboard Screen

The dashboard is the main screen of Budgestic. It shows a summary of the user's financial activity.

The dashboard may include:

- Total income.
 - Total expenses.
 - Current balance.
 - Recent transactions.
 - Budget alerts.
 - Navigation buttons for receipts, expenses, insights, reports, and profile.
-

8. Receipt Upload Screen

The receipt upload screen demonstrates the receipt scanning feature.

Users can:

1. Upload a receipt image.
 2. Scan a receipt using the camera.
 3. Process the receipt using OCR.
 4. Review extracted information.
 5. Save the expense.
-

9. Expense Tracking Screen

The expense tracking screen shows how users view and manage expenses.

Users can:

- Add manual expenses.
- View expense history.

- Categorise expenses.
 - Check spending by date or category.
-

10. Cash Flow Report Screen

The cash flow or report screen shows how users review income, expenses, and balance.

The app displays:

- Total income.
 - Total spending.
 - Remaining balance.
 - Spending summaries.
 - Financial reports.
-

11. Spending Insights Screen

The spending insights screen provides AI-based analysis.

The app provides:

- Spending habit summaries.
 - Budgeting suggestions.
 - Category-based insights.
 - Recommendations to reduce unnecessary spending.
-

12. Predictions and Notifications Screen

The prediction and notification screens show how Budgetic reminds users about frequently purchased items.

For example, if a user often buys milk, the app may notify the user when milk is likely to run out.

13. Profile and Settings Screen

The profile and settings screen shows where users manage personal details and preferences.

The app may include:

- User profile information.
 - Budget preferences.
 - Notification settings.
 - App settings.
-

14. Troubleshooting

Problem	Possible Cause	Solution
App design does not open	Incorrect link or no internet	Check link and internet connection.
Buttons do not work	Some screens may not be linked	Return to main screen or check clickable areas.
Screen size looks different	Browser or device size issue	Use present mode or adjust zoom.
Figma asks for login	Permission setting	Use shared public link or sign in to Figma.
App design is slow	Internet or browser issue	Refresh the page or use another browser.

15. Conclusion

Budgetic demonstrates the design and user flow of the mobile budgeting and receipt analysis application. Users can view how the app works, explore the main screens, and understand the main features.
