

Budgestic – AI-Powered Budgeting & Receipt Analysis App

Project Overview

Budgestic is a mobile budgeting and receipt analysis application. The app allows users to upload or scan receipts, track income and spending, view cash flow reports, and receive AI-based financial insights.

This project was developed for IT3090 Assessment 4.

Student ID	Student Name
H20937	Rajat Adhikari
ULG20814	Biraj Thapa
ULG20520	Bishwash Thapa

Supervisor: Dr. Sherif Haggag

Main Features

- Welcome screen.
 - Login screen.
 - Create account screen.
 - Dashboard screen.
 - Receipt upload screen.
 - Expense tracking screen.
 - Cash flow report screen.
 - Spending insights screen.
 - Prediction screen.
 - Notification screen.
 - Profile and settings screen.
 - Mobile-first UI/UX design.
 - Interactive navigation flow.
-

Technologies Used

Tool / Technology	Purpose
Figma	App design and UI/UX
GitHub	Repository for documentation and supporting files
Flutter	Mobile application development
Dart	Flutter programming language
Tesseract OCR	Receipt text extraction
SQLite	Local database storage
Python	AI/ML spending analysis
Android Studio / VS Code	Development tools

Project Scope

In Scope

- Mobile app design.
- Interactive screen navigation.
- UI/UX design.
- Receipt upload feature.
- Expense tracking feature.
- Cash flow and report feature.
- Spending insight feature.
- Prediction and notification feature.
- User documentation.
- Testing documentation.
- Final project report.

Out of Scope

- Bank API integration.
- Web application.
- Advanced investment tools.
- Full commercial deployment.

How to View the App

1. Open the Figma app design link.
 2. Click the play/present button if required.
 3. Start from the welcome screen.
 4. Use clickable buttons or navigation links to move between screens.
 5. Review the dashboard, receipt upload, expense tracking, reports, insights, predictions, and settings screens.
